

Anik F2

Superior coverage of North America with C-, Ku- and Ka-band capacity

- C-band capacity supports broadband applications and satellite trunking into remote communities
- Ku-band coverage throughout North America ideally suited for enterprise and government mobility applications
- Ka-band supports advanced consumer broadband services in the USA and Canada, including the Far North
- Provides greater choice and flexibility for virtually any application with C-, Ku- and Ka-band on one satellite
- Inclined orbit operations
