

## Creating Loyalty through Connections

Today's airline passengers not only expect inflight Wi-Fi, but their customer satisfaction and loyalty are also directly influenced by their ability to connect.

78%

of global travelers desire inflight Wi-Fi

94%

of global travelers say Wi-Fi would enhance their travel experience

67%

of air passengers are more likely to re-book an airline that offers Wi-Fi

### TODAY'S CONNECTIVITY CHALLENGES

**Inconsistent** Wi-Fi experiences from flight to flight

**Inability to support** passengers' bandwidth-intensive applications

Impact on airline operating expenses **(too expensive)**

**TELESAT LEO:** Home-like Internet Inflight, Gate-to-Gate, Everywhere

High-throughput capacity with low latency delivers exceptional connectivity to every passenger, every flight

Predictive analytics allocates bandwidth wherever it's needed, whenever it's needed

Transformative economics with the ability to offset OPEX through operational efficiencies and partnership revenue streams

With Telesat LEO, exceptional connections are guaranteed: **gate-to-gate.**
