Health and Safety Statement

Safety is an attitude that must be nurtured and recognized by everyone as a basic part of our Corporate responsibility.

Our policy is to protect you in doing your job. This is done by ensuring that the working environment is designed, constructed and maintained in such a manner that your safety, and that of the public, is adequately considered at all times.

Safety in the workplace must have equally as high a priority as quality does in the overall performance of our work, and the success of our accident prevention and loss control depends on the support and commitment of all employees.

Let's all share in the responsibility of observing and promoting safe work practices and a healthy workplace at all times

A handwritten signature in black ink, appearing to read "Daniel Goldberg".
